

Jeff Tarimo

IoT Engineer || Full stack Developer || DevOps Engineer

Dynamic Engineer with over 5 years of experience in electronics and IoT, specialising in advanced firmware development and strategic technology solutions. Expertise encompasses the full spectrum of system design, from front-end interfaces to back-end architecture, ensuring seamless integration and functionality. Proficient in managing diverse teams and driving project success through innovative problem-solving and effective planning. Committed to leveraging technical skills and a proactive approach to contribute significantly to a forward-thinking organisation, fostering growth and excellence in all endeavors.

Professional Experience

HEAD OF TECHNOLOGY

Powerpay Africa, Nairobi, Kenya

February 2025 - Present

- Led infrastructure growth and strategic IT planning.
- Managed hardware and software teams to reach company goals.
- Project management and planning.
- Orchestrated company technology solutions and made decisions on tech stack.

HEAD OF IoT

Powerpay Africa, Nairobi, Kenya

February 2023 - January 2025

- Pioneered advanced IoT firmware development using C++ and MicroPython.
- Mastered deployment of diverse communication protocols: Wi-Fi, BLE, GPRS, MODBUS (RS485).
- Directed backend architecture with NodeJS, Django, and Python.
- Built frontend interfaces with HTML and Flutter.
- Managed servers on Ubuntu with Azure and AWS.
- Automated workflows using Node-RED.
- Integrated powerful APIs for scalability.
- Resolved hardware issues.
- Delivered smart metering solutions.

HEAD OF IoT

Upande Limited, Nairobi, Kenya

September 2022 - January 2023

- Led IoT projects as Product Owner.
- Engineered workflows using Node-red.
- Held similar duties as prior IoT Engineer role.

IoT ENGINEER

Upande Limited, Nairobi, Kenya

April 2021 - August 2022

- Monitored IoT systems and resolved issues.

Key Skills

MICROCONTROLLERS:

RASPBERRY PI, ESPRESSIF, STM32 ETC

BACKEND DEVELOPMENT:

PYTHON, DJANGO, NODEJS

FRONTEND DEVELOPMENT:

JAVASCRIPT/TYPESCRIPT, HTML, CSS(DaisyUI, Flowbite, Bootstrap)

DEVOPS: LINUX, REDIS, CI/CD,

SERVER MANAGEMENT

DATABASES: MYSQL,

POSTGRESQL, INFLUXDB

FIRMWARE DEVELOPMENT:

C/C++

WIRELESS COMMUNICATION:

LORAWAN, LORA, CELLULAR, BLE

ELECTRONIC CIRCUIT DESIGN

AND TROUBLESHOOTING

Languages

ENGLISH

SWAHILI

- Recommended hardware/software upgrades.
- Delivered stakeholder updates and reports.
- Assessed technologies and collaborated on components.
- Designed distributed systems and defined requirements.
- Conducted testing and maintained documentation.
- Managed inventory and improved system performance.

Education

Bachelor of Science in Electronic and
Computer Engineering

September 2015 - December 2021

JOMO KENYATTA UNIVERSITY OF
AGRICULTURE AND TECHNOLOGY, Juja,
Kiambu, Kenya.

Certifications

CCNA (Routing and Switching)
AFRALTI

July 2018

WebDevelopment
INSTITUTE OF SOFTWARE TECHNOLOGY
(IST)

May 2020
